Round 8 of the 2025 Championship

Round 8 and the final round of the 2025 Championship was held on the 18th October 2025.

The final champion positions and points tables can also be found on the MTMBC website.

The weather on the day proved to be fine and although one could feel the approach of cooler days ahead the racers spirits showed no sign of letting up. The number of racers continue to show a very encouraging upward trend and this bodes well for the 2026 season.

A visual inspection of the race course showed it was clear of weed thanks no doubt due to the slightly cooler weather.

With the race course being clear and everyone present a start was made and all the races completed around 2 o'clock. Racing as usual was fast and furious with everyone trying to make up a few extra points towards the championship and despite a few bumps along the way all went off without any real issues.

2026 will include a new class, Mono2, and we look forward to seeing how this goes during the season.

Many thanks to all who helped with race control, scoring and buoy judging.
